

Satellite radio provides variety and quality that are not available elsewhere, that's why I choose to pay extra for it. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. I respectfully urge the FCC to REJECT the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve.

It's not my problem that "regular" radio can't compete in their chosen industry, they should not be permitted prevent me from exercising freedom of choice with a vendor who can. This is absolutely un-American!
